

WELD WRAP WELD SPLATTER, HOT SLAG, & WELDING SPARK PROTECTION STAYS FLEXIBLE IN LOW TEMPERATURES

Techflex® Weld Wrap® (WWN) is braided from fiberglass yarns with high temperature coating and velcro closure. Commonly used for protecting welding hoses against flame and abrasion, when dragging weld slag across the floor. This product will withstand continuous exposure to temperatures of 400°F/204.4°C, and intermittent introduction to temperatures of 750°F/399°C. The heavy duty hook and loop closure ensures a tight seal and allows Weld Wrap® to be installed easily over existing assemblies. Weld Wrap® also provides a high level of abrasion and penetration protection to increase the useful life of any hoses exposed to rough or abrasive surfaces.
